

Malwarebytes TECHBENCH

Portable malware tool for the professional technician

Malwarebytes Techbench delivers industrial strength malware detection and removal in a convenient USB stick. Plug it into an infected computer and Malwarebytes Techbench automatically removes spyware, Trojans, worms, and other malware. No need to install Malwarebytes Anti-Malware. No need to monitor the scan. It's like having another technician in your pocket.

Features and Benefits

Malwarebytes Anti-Malware (Portable edition)

- **Anti-Malware:** Detects and removes zero-hour and known Trojans, worms, adware, spyware, and other malware.
- **Three System Scan Modes (Quick, Flash, Full):** Enables selection of the most efficient system scan for user requirements.
- **Advanced Malware Remediation:** Employs delete-on-reboot to remove persistent or deeply embedded malware.
- **Command-Line Interface:** Offers an alternative to the Malwarebytes GUI for control and flexibility.

Malwarebytes Chameleon

Protects Malwarebytes Techbench against malware's attempts to disable it.

Silent mode

Enables all major Malwarebytes Techbench operations to be conducted automatically, without user involvement.

Malwarebytes Anti-Malware installer

Installs a consumer version of Malwarebytes Anti-Malware after the computer has been cleaned.

15 GB Storage

Allows user to store extra files and tech tools on Malwarebytes Techbench.

Quarantined files and log storage

Stores quarantined files and scan logs on Malwarebytes Techbench for easy access and to reduce the chance of reintroduction of malware to the cleaned computer.

Intuitive and automatic scan log labeling

Stores the scan log for each scanned system in its own individual folder under the scanned system's name for convenient retrieval and reference.

Unique form factor

Makes Malwarebytes Techbench USB stick easy to locate and hard to lose. Slim design enables easy insertion into crowded ports. Keyhole makes it simple to string onto a lanyard or keychain.

Pre-compiled USB stick

Eliminates the need to download and configure software. The software installation is factory tested.

Unlimited usage

Allows the user to clean as many computers as needed without incurring additional costs.
