**Malware**bytes

CASE STUDY

Undetected malware threatens to disrupt company networks

Antivirus was not catching ransomware coming in via external devices

Issues solved with a quality and cost effective product

Hundreds of endpoints now easily managed

Challenges

- **Domino effect** occurred when one component of the network was infected or malfunctions
- **No way to know about existence** of all malware entering the network
- **Lurking threats** were still entering the system, even after cleaning up infections
- **Threats on endpoints** were not being caught by the previous antivirus system

Reasons for Choosing Malwarebytes

- **Cloud-based management:** Malwarebytes' cloud-based console allows network access from the office and on the road.
- **Effective and cost-efficient:** Malwarebytes was able to provide a high-quality product for a price that fit into the company's budget.
- **High-level threat analysis:** Malwarebytes notifies admin with a report regarding the types of malware targeting the company, allowing them to quickly initiate remediation measures.
- **Removes related artifacts:** Malwarebytes removes all threat artifacts linked to malware, so the IT team does not have to worry about any missed threats.

OVERVIEW

CUSTOMER
Woodlands Transport
Singapore

1,000+ vehicles on the road daily

INDUSTRY
Transportation

IT ENVIRONMENT
Windows Defender, layered enterprise security solutions

SOLUTION
Malwarebytes Endpoint Protection

Woodlands Transport®

> ❝
> We chose the right solution. We replaced our previous antivirus in weeks. Ransomware attacks are enormously disruptive, and with Malwarebytes blocking attacks, the business is happy, because it's business as usual.
>
> Marcus Lee, Manager, Group Information Technology
> Woodlands Transport Security Pte Ltd.

How Malwarebytes Solved the Problem

- **Prevents recurrence** of ransomware, eliminating associated downtime and disruption
- **Increased visibility** into current threat landscape and potential attack spikes
- **Simple endpoint protection management** across geographically distributed systems
- **Effective protection** with assurance of all threat artifacts being removed
