

CASE STUDY

Antivirus system lacks protection against all threats

Trend Micro lacked sufficient protection

Multi-vector approach covers all kinds of threats

Detected 30,000 instances of malware ignored by Trend Micro

Challenges

- **Trend Micro** was unable to protect against advanced malware attacks
- **Protection had to reach remote offices** across 500 square kilometers

Reasons for Choosing Malwarebytes

- **Multi-vector protection:** Malwarebytes provides web protection, application hardening, and exploit mitigation among other services.
- **Cloud based management:** The team can manage each location's computers over its own internet link without having to send updates across microwave connections.
- **Real time web blocking:** Malwarebytes stays on top of site blacklists, keeping the company safe from malicious webpages automatically.

How Malwarebytes Solved the Problem

- **Detects and removes** thousands of pieces of malware, junkware, ransomware, and related artifacts that the traditional antivirus missed
- **Simplifies endpoint security management** across a large area with remote systems
- **Reclaims bandwidth** from excess web traffic generated by adware and command-and-control malware
