

MALWAREBYTES MOBILE SECURITY FOR MSPS

Unified protection for your customers' mobile devices

Mobile Devices: The Cybersecurity Gap

Mobile devices are a key part of today's modern business, so smartphones and tablets have become richer targets for exploitation and cyberattacks, especially since employees carry them into places where they can be lost, stolen, or breached through rogue Wi-Fi. Whether employer-provided or employee- or student-owned, mobile devices are tempting targets for malicious threat actors.

Yet, those mobile devices remain under-protected. Not surprisingly, 97% of organizations have faced mobile threats and 46% have had at least one employee download a malicious mobile app that threatened the corporate network and data.¹

Malwarebytes Makes Mobile Security Easy

Malwarebytes makes it easy to address security risks with award-winning protection across your customers' mobile and traditional endpoints.

UNIFIED ENDPOINT MANAGEMENT: Malwarebytes Mobile Security extends our powerful endpoint protection across your customer mobile devices to substantially strengthen their cybersecurity posture. Malwarebytes empowers MSPs to save time and resources with unified endpoint management for both your client's traditional and mobile devices—centrally managed from the same cloud-native console.

ADVANCED MOBILE PROTECTION: Malwarebytes Mobile Security extends our award-winning endpoint protection to Chromebooks, Android, iPadOS, and iOS devices, guarding against the latest mobile threats such as ransomware, malicious apps, and PUPs. With real-time protection, your customers can also prevent accidental access to harmful websites, safeguard against malicious apps, block unwanted in-app ads, and enable a secure mobile experience for their employees.

GAINED CENTRALIZED VISIBILITY: Powerful security starts with pervasive visibility. With Malwarebytes Mobile, your MSP team can easily view activity across Chromebooks, Android, iPadOS, and iOS devices—in real time.

- Gain a single, unified platform and visibility for customers' traditional and mobile endpoints
- Monitor and protect your clients' mobile investments from a single pane of glass
- Understand the threats to your customers' mobile devices and mitigate the risks

EXTEND YOUR MSP PLATFORM: Malwarebytes Mobile extends our MSP platform, OneView, making it simple to deploy and manage the product from the same central console you already know and trust for managing your customers' protection and remediation.

MSP SALES AND MARKETING KITS: To help you grow your business by offering Mobile Security as a service to your customers, Malwarebytes provides pre-built sales and marketing kits. With sales briefs, messaging guides, social media posts, and more your MSP has all the tools required to offer this service to your customers.
